

**This program is not yet up and running. This website will be updated once the program is in place.**

*I've heard about a "Cash for Clunker" appliance rebate program. Will Maryland be participating?*

While the program is not officially called the "Cash for Clunker" appliance program, Maryland is participating in the Department of Energy's energy efficient appliance rebate program. Maryland submitted an application to the Department of Energy on October 15th for \$5.4 million in funding. **The program was approved by the Department of Energy in early December, and is set to launch in late winter/early spring 2010. The program is not retroactive, so purchases made before the program launches will not qualify for the rebate.**

*How do I get an appliance rebate?*

If you are a customer of BGE, Allegheny Power, Pepco, SMECO, or Delmarva Power, you can get an appliance rebate through your utility **right now**. These are mail-in rebates, which means you can purchase the appliance anywhere, fill out a form with the proper documentation, and get a check in the mail. Programs vary by utility. The stimulus funding will be layered on top of the utility programs, to provide consumers with additional rebates on other products. You will be able to take advantage of both the utility appliance rebate and the federal appliance rebate at the same time. All rebates will be handled through the utilities, and rebates are not retroactive.

For more information on the utility programs, visit their websites:

Allegheny Power: <http://www.alleghenypower.com/EngConserv/MD/WattWatchers/RebatesRes.asp>

BGE: [www.bgesmartenergy.com](http://www.bgesmartenergy.com)

Delmarva: [www.delmarva.com](http://www.delmarva.com)

Pepco: [www.pepco.com](http://www.pepco.com)

SMECO: [www.smeco.coop](http://www.smeco.coop)

*Which appliances will be rebated with stimulus money?*

GREAT NEWS! Maryland just received approval for higher rebate amounts. States were free to choose the type of appliance to rebate, as well as the rebate amount for each product. Maryland will be offering a **\$300 rebate for ENERGY STAR electric heat pump water heaters**, a new and very efficient piece of equipment. Stimulus funds will also provide **\$100 for super-efficient clothes washers** and **\$50 for super-efficient refrigerators**. These dollar amounts are in addition to any rebate offered by the utilities for ENERGY STAR models. BGE, Allegheny, Pepco, SMECO, and Delmarva Power currently offer other appliance rebates as well (see above).

*How do I find out which appliances qualify?*

ENERGY STAR Electric Heat Pump Water Heaters: Any electric heat pump water heater with the ENERGY STAR logo will qualify. Models can be found here:

[http://www.energystar.gov/index.cfm?fuseaction=heat\\_pump.display\\_products\\_html](http://www.energystar.gov/index.cfm?fuseaction=heat_pump.display_products_html)

To qualify for the rebate, clothes washers and refrigerators must meet certain standards, corresponding to the Consortium for Energy Efficiency's Tier 2 or Tier 3 appliances. **These standards exceed the current ENERGY STAR criteria for these appliances.** Lists of qualifying models can be found in the below:

Super-efficient Clothes Washers: Modified Energy Factor (MEF) of 2.0 or greater AND Water Factor (WF) of 6.0 or less (<http://www.cee1.org/resid/seha/rwsh/rwsh-prod.pdf>)

Super-efficient Refrigerators: Annual kWh usage is at least 25% more efficient than the federal standard ([http://www.cee1.org/resid/seha/refrig/files/ref\\_prod.pdf](http://www.cee1.org/resid/seha/refrig/files/ref_prod.pdf))

MEA will be working with the utilities and manufacturers in the near future to make these lists more consumer-friendly.

*Where can I purchase the appliances?*

You can purchase qualifying appliances at any Maryland retailer or online. You will need to submit relevant documentation (receipts, etc) in order to receive your rebate.

*Do I need to turn in my old appliance, like in the "Cash for Clunker" cars program?*

No, you will not need to turn in your old appliance to get a rebate in most cases\*. However, you will have to certify that you are *replacing* an old appliance of the same function. This means that you can't put your old refrigerator in the basement as extra storage and still get a rebate for a new fridge – the purpose of this program is to save you energy and money by replacing your old appliance with a new one. We encourage you to take advantage of any utility or retailer appliance recycling programs. BGE and SMECO offer additional rebates for recycling, and many major retailers will dispose of your appliances for no additional charge.

\*Allegheny Power requires recycling of your old refrigerator in order to receive a rebate

*When will the program be up and running?*

We are looking to launch the program in spring 2010, likely sometime in April. As mentioned above, you may be able to take advantage of the utility programs if you're looking to purchase appliances before then. The rebate program will not be retroactive.

*How will I know when the program launches?*

MEA will update our website with the most current information. To stay up-to-date about this and other MEA programs, sign up for our newsletter at [www.energy.maryland.gov](http://www.energy.maryland.gov), by clicking on "News and Events." You will also receive marketing information from your utility provider, in the form of bill inserts, radio ads, etc.

*Are there any other sources of rebates or tax credits?*

For federal tax credits, visit [www.energystar.gov/taxcredits](http://www.energystar.gov/taxcredits). There are no state tax credits available at this time.

To find out about manufacturer's rebates available, visit [www.energystar.gov](http://www.energystar.gov), click on "Products," then click on "Special Offers" (green bar on the right). Enter your zip code for additional information.

*What if I'm not a customer of one of those five utilities?*

MEA will be offering a simplified rebate program for customers of municipal and cooperative utilities. Look for marketing information on the MEA website or with your utility bills sometime in early 2010 for more information.

For additional information, contact the Maryland Energy Administration at 410-260-7655.
